I had started this game on the Wii and was eager to play it on the PC. PC is MUCH easier as the tasks are much smoother. Thank goodness. I had been wondering how this mystery ended and it was nice to start over again. However, it seemed tougher than I remembered in other ways.

I raged so much with this game. Whereas I had no problem playing "Scopa" in "The Phantom of Venice" it is required to beat a character at a game of "Fox and Geese" and I hate that game horribly. It was just a pain to play and no fun. A couple of the puzzles were hard to do with the limited amount of time it takes to do them and I'm just no good at using the snowmobile.

A quirk of the game is that you also have to cook 3 meals a day as well as the housekeeping for most of the game. I'm not sure how to weigh the game when it comes to spoilers though. I've not played the games in order and Tino Balducci appears in this game and is apparently a character that returns from a previous game. While I don't know the whole story with the unmentioned previous game, I do wonder if there are any spoilers with the things Nancy says about him. I guess I'll find out when I play said game.

This game though takes a lot of patience to play. You have a clock and you have extra duties and it can get dull and repetitive. Things happen at certain times and the game, if you mess up too early, can be a little too unforgiving. I had accidentally had issues with the clock and had to restart the whole game because I couldn't meet the guests otherwise.

I think this game was certainly harder than I had expected. It's not impossible, but it can be really agitating. That being said, the story is still interesting and if you have the resolve, it can be rewarding, I suppose. I would suggest it to people who enjoy these types of games. Some people like more of a challenge than I do. I prefer relaxing puzzles and good stories. This game is easy in some ways and hard in others, so it just depends on the sort of player you are. Despite my raging moments, it was nice to finally see how the story ended.. I Love the game, but bugs are killing the experience, don't pay full price for it.. What started off as an interesting, albeit not revolutionary or new concept quickly fell off due to its clunky controls and tiresome gameplay.

There are a few positive aspects to the game. The different levels are layered in the background, gradually coming to the front whenever the player enters a new level which makes for a nice visual effect and a bit of foreshadowing of what levels are yet to come. The sparse ambient background sound is soothing and the clicky cube bumps are satisfying to hear.

Mostly though Gravilon quickly becomes frustrating and a chore to play rather than being fun. One level for example requires the player to either get it right directly or fail subsequently in order to leave a precisely placed "cube corpse" boost needed to advance. And there are a lot more instances where hard to anticipate gravity physics interfere with your control over the cube.

Gravilon is a hard minimalistic indie platformer and in order to keep the player interested I feel there needs to be something else. It is lacking strong polished controls leaving the gameplay to be just not good enough. I tried getting into Gravilon but failed to keep myself engaged.

(Completed 6 levels of 32). I don't know how this got so many positive reviews (the only reason I even bought the game)...

**\*PROS\***

- Cute graphics/art style

**\*CONS\***

- The most REPETITIVE GAMEPLAY EVER. Unless you cheat (I definitely did - and even then I was bored to tears) you're going to be grinding for money and materials in the hopes that your monsters will be able to progress.
- The story's really hard to follow
- Clunky UI/menus

I had a bit of a Tower Defense itch and thought this game would be able to scratch it - but I'll stick with games like Defender's Quest/Kingdom Rush (both of which have a good handle on progression, story, and unit building).. Nice little escape room style

. This game is life. Opened a door with a vent.

10/10. I liked the game so much! All the characters were special and envolving in their own ways. The only thing I didn't get was why there are some answers that are locked :/. This is Straight up a gay♥♥♥♥♥2Hou ♥♥♥♥♥ing Megucas flying and ♥♥♥♥♥ing projectiles, you're all ♥♥♥♥♥ing mongrells. My gate of babylon will tear a new ♥♥♥♥♥ing throat in your cancerous♥♥♥♥♥sama. YES I AM FOR REAL, MY GATE IS LARGER THAN YOURS KING OF GARBAGE, ♥♥♥♥♥ING FAKER-KUN.. if you have a worm fetish, like me. this is for you.. Pretty good game if you don't look at graphics and some non-general mechanics. I rate 6V10.. This game simply came out at the wrong time, if it came out now in the time where Hearthstone is so well known it would have surely gained alot of popularity. For me, it is the card game I enjoyed the most.
