<u>Bufo</u> 689	Head remarkably flat, dark grey, with much blacker & symmetrical markings. Rio Chupat
<u>Bufo</u> 690	Slate colour, with dark markings.— Rio Chupat.— B. Engaño Bay.—

All the above specimens were collected by the officers in the Schooners under the command of M<sup>r</sup> Wickham<sup>7</sup>, during the summer of the year: the colours of each were stated not to have altered, only to be less vivid.—  
|196|

<sup>1</sup> Identified by Darwin (1844) (*loc. cit.*) as *Planaria pulla*, currently *Pseudogeoplana pulla* Darwin. The animals might indeed have been copulating, though another possibility is that one was eating the other.

<sup>2</sup> Identified in *Zoology* 2:91 as *Hydrochærus capybara* Auct. See also *Journal of Researches* 1:56-8.

<sup>3</sup> Specimen 1273 was the male of 1224. CD was mistaken in identifying the bird as *Scolopax*, and it was identified in *Zoology* 3:117-18 as *Tinochorus rumicivorus* Eschsch. For an account of its anatomy see *Zoology* 3:155-6.

<sup>4</sup> This frog was said by Thomas Bell in *Zoology* 5:36-7 to be 'remarkably bufonine', and was listed as *Pleurodema Darwinii* Bell.

<sup>5</sup> See list of Specimens in Spirits of Wine for Thomas Bell's identifications of specimens 673-6 and 682-90.

<sup>6</sup> From the description of its colouring given by Thomas Bell in *Zoology* 5:21-2 this lizard is confirmed to be *Diplolæmus Bibronii* Bell.

<sup>7</sup> Lieutenant John Clements Wickham was second in command of the *Beagle*.

[CD P. 196, dated June-July at its head, commences]

1280  
not Sp<sup>s</sup>.  
Was killed at the Island of Goriti where they are said to be common.— They are also said to be occur in numbers at East Point.— They inhabit burrows in the sand dunes.— It is a likely place for ships to leave this animal, if they are infected with such monsters.— But I think from habits it is an aboriginal.— The occurrence at Island Goriti is no difficulty as a reef now connects the it with mainland, probably was once continuous.— The ears were whitish & oddly contrasted with rest of body.— An old male weighed 15 & ¼ oz:

Cervus<sup>2</sup> 1292

Horns (z)  
1440:1441  
(old in  
front) Cop  
Are very abundant in the mamillated plain round Pan de Azucar.— Manners resembling those at B. Blanca.— This specimen was shot out of a herd of seven.— The Gauchos say he is nine years old:— teeth all decayed.— Smell intolerably strong & offensive, almost creating Nausea.— this seems to occur at seasons when the Horns are perfect: Out of same herd (without moving I shot three. from having crawled a long distance the deer did not know what I was & as usual advanced to reconnoitre me) I shot another & younger buck.— Horns (1337 & 1337)
